

Spreadsheet Compare

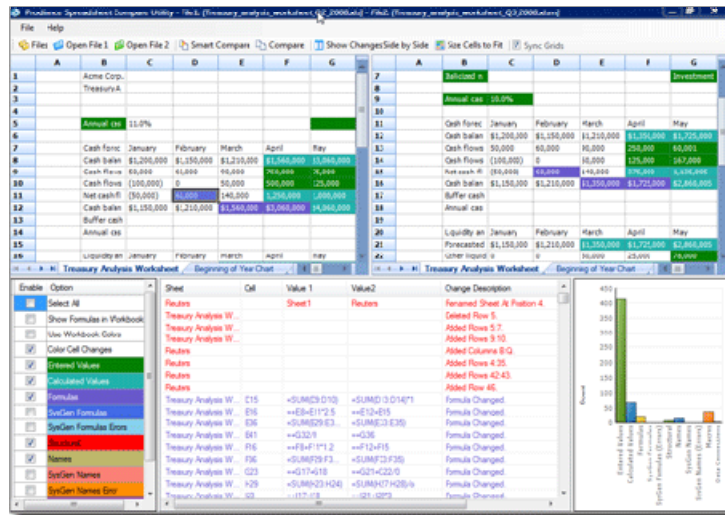

Accelerating Spreadsheet Review and Approval

When mission critical spreadsheets are managed in uncontrolled environments, maintaining changes can be impossible. Unauthorized changes can be made quickly to critical spreadsheets, and spreadsheet owners and approvers may have no idea what was changed, or what impact it may have on the spreadsheet results. Enter Prodiance Spreadsheet Compare, a powerful and graphical application that provides immediate visibility into changes between spreadsheet versions.

Key Features & Benefits

- Enables faster review and approval of critical spreadsheets, and faster closes
- Enables compliance with regulatory mandates (SOX 404, Basel II, NAIC Model Audit Rule, MiFID) for spreadsheet change control
- Provides immediate visibility into key changes to critical spreadsheets across accounting periods
- Enables users to graphically compare changes between two spreadsheets or spreadsheet versions
- Provides graphical, side-by-side and color-coded comparison of changes in context of the original spreadsheet
- Synchronizes comparison views even when rows/columns have been added/deleted
- Comprehensive reporting on all change types with filterable results
- Incorporates a bird's eye view of changes with graphical statistics

With Prodiance Spreadsheet Compare, users can compare two different spreadsheets or two versions of the same spreadsheet and graphically see the differences. For approvers, this makes it very easy to review spreadsheet changes from month to month and helps accelerate the close process. For spreadsheet owners, it provides visibility into important structural changes (to formulas, macros, pivot tables, queries, etc.) and helps improve spreadsheet integrity and auditability

Prodiance Spreadsheet Compare is offered as a stand alone product or as part of Prodiance Enterprise Spreadsheet Manager.

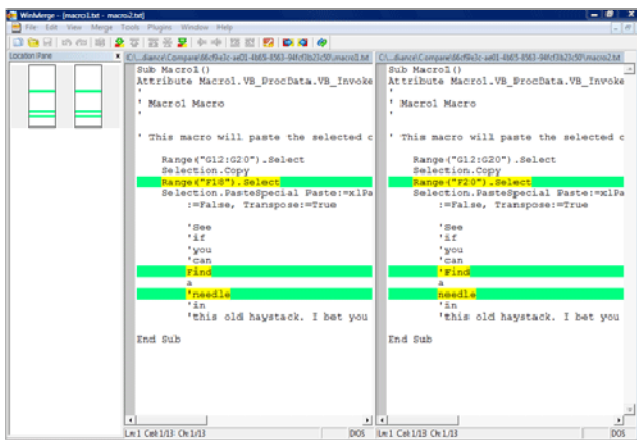

Graphical Comparison of Changes

Prodiance Spreadsheet Compare incorporates a preview of each spreadsheet and detailed list of changes, including macros, cell formatting, entered and calculated values, formulas, formula errors, structural changes, names, and data

connections. Each change category is color coded for easy identification and preview grids are synchronized when the user clicks on each change. A bird's eye view of all changes discovered is provided via a statistics bar chart, and all comparison results can be exported to Excel for reporting and further analysis.

Detailed Macro Comparison

Prodiance Spreadsheet Compare enables detailed, line-by-line comparison of macros and VB code. Macro changes can be selected from the comparison results and displayed side-by-side, showing each code change. This feature is extremely helpful for lengthy and complex macros.

```
Sub Macro1()  
Attribute Macro1.VB_ProcData.VB_Invoke  
'  
' Macro1 Macro  
'  
' This macro will paste the selected c  
Range("G12:G20").Select  
Selection.Copy  
Range("F18").Select  
Selection.PasteSpecial Paste:=xlPa  
:=False, Transpose:=True  
  
'See  
'if  
'you  
'can  
Find  
a  
needle  
'in  
'this old haystack. I bet you  
End Sub
```

```
Sub Macro1()  
Attribute Macro1.VB_ProcData.VB_Invoke  
'  
' Macro1 Macro  
'  
' This macro will paste the selected c  
Range("G12:G20").Select  
Selection.Copy  
Range("F20").Select  
Selection.PasteSpecial Paste:=xlPa  
:=False, Transpose:=True  
  
'See  
'if  
'you  
'can  
Find  
a  
needle  
'in  
'this old haystack. I bet you  
End Sub
```

Proven ROI

By leveraging Prodiance Spreadsheet Compare as a stand alone product or as part of the Prodiance Enterprise Spreadsheet Manager system, organizations can establish effective change control over mission critical spreadsheets, while shortening review and approval cycles, accelerating the close, and improving compliance.
