

# Spreadsheet Compare

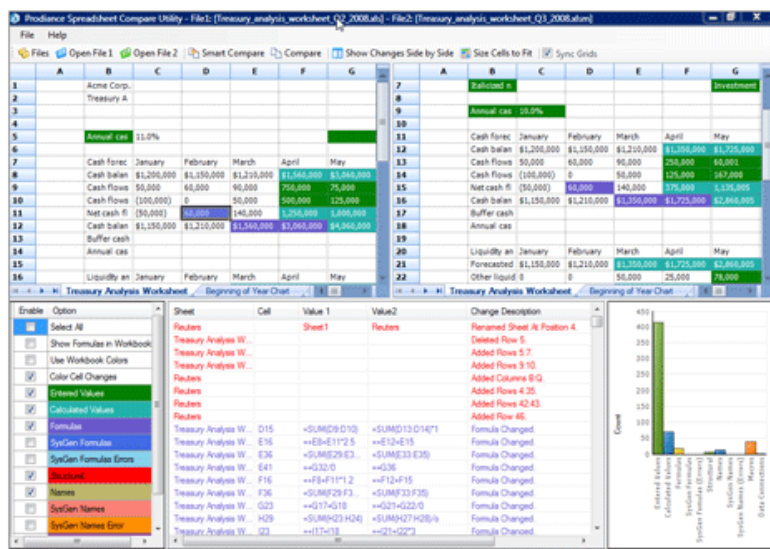

## Accelerating Spreadsheet Review and Approval

When mission critical spreadsheets are managed in uncontrolled environments, tracking and managing changes can be impossible. Unauthorized and/or fraudulent changes can be made quickly to critical spreadsheet models, and spreadsheet owners and approvers may have no idea what was changed, or what impact the changes may have on the accuracy and integrity of the results. Enter Prodiance Spreadsheet Compare, a powerful and graphical application that provides immediate visibility into changes made between spreadsheet versions.

With Prodiance Spreadsheet Compare, users can graphically compare two different spreadsheets or two versions of the same spreadsheet in a side-by-side fashion and quickly see the differences. For reviewers and approvers, Prodiance Spreadsheet Compare makes it very easy to review spreadsheet changes from month to month and helps accelerate routine review and approval processes, resulting in faster closes. For spreadsheet owners, it provides visibility into important structural changes (to formulas, macros, pivot tables, queries, etc.) and helps improve spreadsheet integrity and change control processes.

### Key Features & Benefits

- Enables faster review and approval of critical spreadsheets, and faster closes.
- Enables compliance with regulatory mandates (SOX 404, Basel II, NAIC Model Audit Rule, MiFID) for spreadsheet change control.
- Provides immediate visibility into key changes to critical spreadsheets across accounting periods.
- Enables users to graphically compare changes between two spreadsheets or spreadsheet versions.
- Provides graphical, side-by-side and color-coded comparison of changes in context of the original spreadsheet.
- Synchronizes comparison views even when rows/columns have been added/deleted.
- Comprehensive reporting on all change types with filterable results.
- Incorporates a bird's eye view of changes with graphical statistics.

Prodiance Spreadsheet Compare is offered as a stand alone product or as part of the Prodiance Enterprise Risk Manager System.

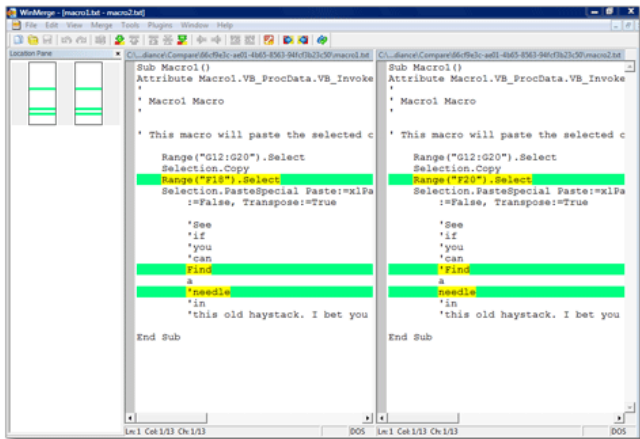

## Graphical Comparison of Changes

Prodiance Spreadsheet Compare incorporates a preview of each spreadsheet and detailed list of changes, including macros, cell formatting, entered and

calculated values, formulas, formula errors, structural changes, links, formatting, names, and data connections. Each change category is color coded for easy identification and preview grids of the compared files are synchronized when the user clicks on each change. A bird's eye view of all changes discovered is provided via a statistics chart, and all comparison results can be exported to Excel for reporting and further analysis.

### Detailed Macro Comparison

Prodiance Spreadsheet Compare enables detailed, line-by-line comparison of macros and VB code. Macro changes can be selected from the comparison results and users can drill down to see line and code change. This feature is extremely helpful for lengthy and complex macros.

### Proven ROI

By leveraging Prodiance Spreadsheet Compare as a stand alone product or as part of the Prodiance Enterprise Risk Manager System, organizations can establish effective change control over mission critical spreadsheets, while shortening review and approval cycles, accelerating the close, and improving compliance.
