

Link Manager

Intelligent Link Management for Spreadsheets

Automating internal controls over mission critical spreadsheets often encompasses linked spreadsheets. Unfortunately, migrating linked spreadsheets from employee desktops to corporate servers where they can be closely monitored often has the side effect of breaking links, resulting in frustrated end users and poor adoption of spreadsheet control technology. Enter Prodiance Link Manager.

Key Features & Benefits

- Saves hundreds of man hours over manual migration and link updating methods.
- Automates the migration of complex, linked spreadsheets from employee desktops or file shares into a secure repository or network location.
- Unique self-healing process tracks and automatically updates spreadsheet links.
- Migration process status and reporting.
- Promotes the use of a controlled environment for mission critical spreadsheets to meet compliance mandates and mitigate operational risk.
- Support for Microsoft SharePoint Services 3.0 and Office SharePoint Server 2007 (MOSS).

Prodiance Link Manager is a robust and easy-to-use software application for automating the migration of linked spreadsheets from employee desktops into corporate servers while preserving the links. Prodiance Link Manager can migrate linked spreadsheets from user desktops, corporate file share locations, or Microsoft SharePoint document libraries into new (file share or SharePoint) locations while intelligently preserving all the embedded links through a unique self-healing process. Links are easily lost or broken via manual copy/paste methods, but Prodiance Link Manager solves this problem by analyzing, tracking and preserving all the links through non-invasive, web based technology.

Unique Self-healing of Links

During the migration process, Prodiance Link Migration Manager maintains a record of all spreadsheet links for (post migration) self-healing. Links for migrated spreadsheets are automatically updated the first time a user opens a spreadsheet from its new location, ensuring the seamless flow of data and improved workbook integrity.

Link File Name	Invalid Link Path	Updated Link Path	Status
Asia.xlsx	http://platinum/sites/learn/Documents/Q1 2009/...	\\platinum\files\linked files\Q1 2009\Asia	OK
W1.xlsx	http://platinum/sites/learn/Documents/Q1 2009/...	\\platinum\files\linked files\Q1 2009\US\West	OK
East.xlsx	http://platinum/sites/learn/Documents/Q1 2009/...	\\platinum\files\linked files\Q1 2009\US\East	OK
Europe.xlsx	http://platinum/sites/learn/Documents/Q1 2009/...	\\platinum\files\linked files\Q1 2009\Europe	OK

Controlled & Automated Migration

With Prodiance Link Manager, any group of spreadsheets (or individual spreadsheets) can be migrated from a network location to a new file share location(s) or SharePoint document library. There are flexible configuration options supporting disposition of the original files (e.g. keep original copies, migrate, or rename) and migration (e.g. move source files only, move source files and subfolder files to new destination, or move to new destination and maintain current folder hierarchy). A simulation feature allows files and migration settings to be tested prior to migration.

Key Features & Benefits

Prodiance Link Manager incorporates the following key features:

- Controlled and audited migration of spreadsheets.
- Flexible migration options to meet a variety of disposition, retention and folder hierarchy requirements.
- Simulation of migration prior to production.
- Self-healing of links (post migration).
- Migration status and reporting.
- Migration to/from desktop PCs, file shares, and SharePoint document libraries.

Proven ROI

By leveraging Prodiance Link Manager, organizations can protect valuable data while saving hundreds of man hours vs. manually re-establishing spreadsheet links or facing adoption issues. The savings are so significant the software often pays for itself within the first migration project!
